- Conference posters

- [1] Transient artifact reduction using sparse optimization (Poster). T. Zhang, H. L. Graber, R. L. Barbour, and I. W. Selesnick. *Biomedical Optics – Meeting of the Optical Society (OSA)*. Miami, Florida. April 26-30, 2014.
- [2] Algorithms for simultaneous low-pass filtering and total variation denoising of neuroimaging data (Poster). I. Selesnick, H. Graber, D. Pfeil, and R. Barbour. *19th Annual Meeting of the Organization for Human Brain Mapping (OHBM)*. Seattle, June 16-20 2013.
- [3] Speech enhancement by translation-invariant group shrinkage/thresholding (Poster). P.-Y. Chen and I. W. Selesnick. *3rd GNY Area Multimedia and Vision Meeting*. City College of New York, New York, NY. June 14, 2013.
- [4] Sparse frequency analysis with sparse-derivative amplitude and phase functions (Poster). Y. Ding and I. W. Selesnick. *IEEE Signal Processing in Medicine and Biology Symposium*. City College of New York, New York, NY. December 1, 2012.
- [5] ECG denoising and QRS detection based on sparse derivatives (Poster). Xiaoran Ning and Ivan W. Selesnick *IEEE Signal Processing in Medicine and Biology Symposium*. City College of New York, New York, NY. December 1, 2012.
- [6] Wavelet Design by Groebner Bases (Poster). East Coast Computer Algebra Day 2002, LaGuardia Community College, New York, May 18, 2002.
